

Hear top young scientists talk about their latest discoveries

On: Wednesday 29 November 2017

At: The Royal Society of Victoria

School students are invited to a free, one-hour forum to hear Victoria's hottest new talent describe their scientific discoveries.

In past years, students have heard about brain training to reduce tendon injuries, carbon-munching nanomaterials and microscopic fluorescent torchlights hunting heart disease in the bloodstream.

The talks will be aimed at year-9 and year-10 students, but students from upper primary to year-12 are welcome.

Fresh Science is a national competition that selects passionate, talented young scientists to present their work to media and public.

Each scientist will talk for five minutes and take questions.

Fresh Science at the RSV

Come and hear what's fresh in science this year

This November, you and your students can hear Victoria's top young scientists talking about their research in a forum designed to light a fire for science in young audiences.

Where: Royal Society of Victoria (8 La Trobe St)

When: Wednesday 29 November 2017

9:45am-10:45am and 11:30am-12:30pm

Cost: Free

Bookings: <https://rsv.org.au/events/fresh-science-2017>

Brain training for tendons

Carbon-munching nanomaterials

Microscopic blood torchlights

Fresh Science, now in its 20th year, is sponsored in Victoria by the Royal Society of Victoria, the University of Melbourne, Monash University, Deakin University, La Trobe University, RMIT University and CSIRO.
